SUMMARY

Accomplished Environmental Control Adviser with a distinguished 16-year track record in waste management, landfill gas systems, and environmental compliance. Proficient in overseeing the day-to-day operations of wastewater treatment, landfill gas systems, and Gas Utilization plants, ensuring strict compliance with regulations and upholding QHSE standards. Acknowledged for adeptly implementing HSE policies, demonstrating effective leadership, and cultivating high-performing teams. I am characterized by an energetic and motivational approach, driven by a profound passion for sustainable practices, research, and the cultivation of robust cross-functional relationships—a persuasive professional with the ability to influence and drive meaningful change.

EXPERIENCE

08/2020 - 12/2022

BIFFA – SOUTH EAST, UK

Environmental Control Adviser

- Effectively conveyed intricate technical guidance, achieving a 95% adoption rate for improvement suggestions.
- Exceeded environmental targets to reduce CAR scores and Leachate legacy for two consecutive years.
- Recognised for conducting site audits to support managers in attaining recognition for their adherence to the integrated management system. This system incorporated standards in quality (ISO 9001), environmental performance (ISO 14001), and occupational health and safety management (ISO 45001).
- Achieved a 50% reduction in compliance gaps on a specific site by conducting a comprehensive environmental audit, identifying site issues, reviewing permits, and compiling data to substantiate permit variations.
- Operated Landfill Gas Utilization Plant system and Leachate Treatment Plant, achieving a 95% compliance and zero incident rate.
- Revamped data reporting by integrating visual elements, establishing an audit trail, and enhancing clarity for management, improving communication with stakeholders.
- Authored essential documents, including risk assessments, method statements, safe operation plans, unit emergency plans, and fire safety plans.
- Achieved compliance with COSHH and fire regulation requirements by effectively managing on-site chemicals.

07/2018 - 08/2020

ROYAL MAIL – FAREHAM, UK

Post Person

- Effectively managed and processed mail using Royal Mail Systems, maintaining timely and accurate handling.
- Showcased responsible and safe driving practices while operating delivery vehicles, upholding the reputable image of Royal Mail
- Optimized delivery routes in collaboration with team members, improving overall efficiency to combat peak delivery seasons, resulting in consistently high customer satisfaction.

11/2016 - 06/2018

BIFFA - SOUTH EAST ENGLAND

Lead Environmental LFG Technician

- Transformed risk assessments, safe operating procedures, method statements, authorizations, and permits to work, enhancing overall safety protocols.
- Cultivated productive contractor relationships, orchestrated streamlined site inductions, and optimized authorization and permit processes.
- Executed high-impact safety measures, including high-voltage lock-out/tag-out, confined space entry, and elevated task management, guaranteeing a secure work environment and zero incident rate through active hazard spotting and reporting.
- Demonstrated exceptional planning and coordination skills with a resolute focus on permit adherence and swift responses to environmental incidents.
- Led a team of technicians, delivering impactful training and mentoring, resulting in a remarkable improvement in site balance and gas plant stability.
- Resolved a longstanding historical migration issue and identified and solved a critical sub-surface leak previously attributed to seasonal gas quality decline.

08/2016 - 11/2016

BIFFA - SOUTH EAST ENGLAND

Environmental LFG Technician

- Balance and maintenance of the gas field in accordance with the Gas Management Plan and established company procedures.
- Supervised and coordinated contractors to guarantee efficient project execution while assuring strict adherence to safe operating procedures, risk assessments, and organizational policies.
- Collaborated directly with stakeholders to effectively address and manage historical gas migration concerns across multiple sites.
- Exceptional attention to detail to facilitate the identification of problems in landfill gas and leachate systems.

05/2015 - 06/2016

VIRIDOR - SOUTH EAST ENGLAND

Auditing Technician

- Successfully consolidated the import of data from over 50,000 assets across 360+ waste management facilities, encompassing wastewater treatment, material recycling, and energy recovery plants, as part of an extensive enterprise asset management project utilizing SAP.
- Acquired in-depth knowledge of each facility's processes, equipment, and operational requirements, facilitating accurate data capture and customization of the asset management system to suit individual facility needs.

09/2008 - 11/2014

VIRIDOR - SOUTH EAST ENGLAND

Lead Environmental Technician

- Managed the environmental aspect of 7 landfills to conform to BSI standards 9001, 14001, OHSAS 18001, and to implement 50001.
- Led a team of gas technicians, providing thorough training and mentoring.
- Implemented stringent quality control measures, upholding high standards in gas monitoring activities and compliance with health and safety regulations. Attained the top region ranking for six consecutive years.
- Rationalized routine tasks, maintenance, breakdown management, and stock levels using a Computerized Maintenance Management System (CMMS).
- Optimized cost savings by formulating budgets, managing spending, and strategically scheduling work, resulting in significant financial efficiencies and savings for the company.
- Managed the demarcation and registration of assets in Atex registers.

03/2005 - 09/2008 **VIRIDOR - SOUTH EAST ENGLAND**

Environmental LFG Technician

- Ensured the precise balance and maintenance of the gas field in accordance with the Gas Management Plan and established company procedures.
- Supervised and coordinated contractors to guarantee efficient project execution, insisting on strict adherence to safe operating procedures, risk assessments, and organizational policies.
- Collaborated directly with stakeholders to effectively address and manage historical gas migration concerns across multiple sites.
- Exhibited exceptional attention to detail in the identification, fault-finding, and troubleshooting of landfill gas systems, enabling accurate diagnosis of errors and effective resolution.
